

Raksha Shivashankar Mangasuli

Mobile: +49 174 3897390
Email: mangasuliraksha@gmail.com
Address: Nordring 148, Nürnberg, Germany

EDUCATION

Oct 2025 – Present | International Information Systems M. Sc.

Friedrich-Alexander-Universität, Erlangen-Nürnberg

Subjects: Digital Transformation Project, Organizing for Digital Transformation, Managing Enterprise Wide IT Architectures, Machine Learning, Knowledge Discovery in Databases, Artificial Intelligence, AI Assistance in the Data Science Value Chain, People Analytics using Python, Visualization, Applied Software Engineering

Aug 2016 – Sep 2020 | Computer Science B. E.

Visvesvaraya Technological University, India

Jul 2014 – Mar 2016 | Pre-University (Physics, Chemistry, Mathematics, Statistics)

Expert Pre-University College, India

SKILLS

Programming Languages: JavaScript / Typescript, HTML, CSS, C#, SQL, Python

Tools & Platforms: Visual Studio, MS SQL, PgAdmin, AWS Cloud, Jira, Git, Jenkins, NodeJS, Bitbucket, TFS, SourceTree

Frameworks & Libraries: React, Angular, D3, ASP.NET MVC, ASP.NET Core, ADO.NET, Entity Framework

Spoken Languages: English - C1; German - B1.2 (actively improving)

Soft Skills: Team worker, Solution oriented, Collaborative, Reliable

ACADEMIC PROJECT

Digital Transformation Project | *Industry Collaboration with Siemens* | *FAU Erlangen-Nürnberg*

- Collaborating with a Siemens industry partner to evaluate whether consumer devices can perform industrial operational functions; defining use cases, deriving product concepts, and assessing associated risks, opportunities, and digital business models.
- Plan to design and prototype a low-code/no-code application for an Industrial device - applying digital transformation frameworks, reflecting on feasibility and disruption potential

Data Visualization | React, JavaScript, D3

- Built an interactive map + timeline dashboard; currently adding tooltips and brush-based filtering.
- Integrated D3 visual layers with React state/components.
- Improved large-data performance with aggregation and throttled renders with memorization.

WORK EXPERIENCE

Jul 2026 – Present

Working Student, Community Innovation Development - Siemens Healthineers, Forchheim, Germany

- Building new features for an internal admin platform (React), including UI/UX decisions grounded in usability research
- Redesigning the landing page and UI layout for a new weekly content feature on an 800+ member community platform, set to launch soon
- Contributing to custom visualizations for weekly operational tracking and monthly strategic reporting
- Reviewed operational Excel sheets to identify recurring process pain points, informing planned improvements to the internal admin platform

Jun 2024 – Oct 2024

Systems Engineer – TCS, India

- Supported system operations by monitoring health and resolving initial issues.
- Delivered small features and defect fixes with unit tests, while following documentation, tracking, and version control protocols.

Apr 2022 – May 2024

Senior Systems Engineer – Infosys, India

Project: BITS – Agriculture R&D Domain

- Developed and maintained .NET Core backend services and REST APIs; assisted with .NET 3.0 migration to 6.0
- Enhanced UIs (Aurelia, React) and resolved incidents in ServiceNow, meeting SLAs
- Contributed to end-to-end application architecture - AWS Lambda functions, data pipelines - while managing BioConnect, a platform with 10+ interdependent sub-systems
- Collaborated with international teams, vendors, and clients; produced technical documentation for transitions

Feb 2021 – Mar 2022

Systems Engineer – Infosys, India

Project: Autopoint Marketing - Automotive Marketing Domain

- Worked as a full-stack developer using .NET, MS SQL, and JavaScript
- Enhanced website functionality through Jira story implementation and bug fixes
- Performed database optimization, including stored procedure tuning
- Integrated unit testing and test coverage improvements using SonarQube
- Participated in QA testing cycles using TestRail, documented test cases

Nov 2020 – Jan 2021

Systems Engineer Trainee – Infosys, India

- Completed training under Microsoft Technology stream
- Built a demo travel website using C#, Angular, SQL, and .NET framework as part of the final project

HOBBIES & INTERESTS

- Writing blog articles | Reading fiction novels | Hiking | Cycling | Running 5Ks and 10Ks
